USFCR VERIFIED VENDOR 2025

COMPANY OVERVIEW

DC Digital, LLC dba SiteSource delivers modern, secure, and scalable software solutions for government agencies. We specialize in custom software development, system modernization, and cloud-based infrastructure, ensuring reliable and efficient digital transformation. Our expertise in Section 508 compliance, cybersecurity best practices, and intuitive user experiences allows agencies to streamline operations, improve accessibility, and enhance mission-critical systems with confidence.

TESTIMONIALS

"SiteSource has been our dev partner for over a year and has proven to be the most effective and efficient team we've ever worked with, both with internal technology and our website development."
Manly Bands Johnathan Ruggiero, Founder & CEO

SERVICES

Custom Software & System Modernization
We develop secure, scalable applications and modernize legacy systems to enhance government efficiency, security, and compliance with federal IT standards.

Cloud Infrastructure & System Integration
We provide cloud migration, management, and secure API integrations to streamline data flow, improve performance, and enhance interoperability between systems.

Section 508 Compliance & Accessibility Solutions
With blind engineers on staff, we ensure digital platforms meet Section 508 and WCAG standards, making government services accessible to all users.

DIFFERENTIATORS

SiteSource sets itself apart through a unique blend of tangible expertise and firsthand federal experience. Its founders, with backgrounds at the Department of Education, U.S. Digital Service, and 18F, bring a deep understanding of government modernization challenges, while the inclusion of blind engineers underscores its unmatched proficiency in accessibility. The company's robust technical infrastructure—rooted in custom software development, agile project management, and CMS solutions—ensures secure, scalable, and fully Section 508-compliant digital transformations. These concrete operational strengths position SiteSource as a distinct and reliable partner for government contracting.

NAICS CODES

Primary NAICS: 541511 - Custom Computer Programming Services

Secondary NAICS: 541512

CORE COMPETENCIES

- Custom Software Development
- Legacy System Modernization
- Cloud-Based Infrastructure
- Section 508 & Accessibility Compliance
- Enterprise Content Management Systems (CMS)
- Agile Project Management & Development
- System Integration & API Development
- Cybersecurity & Compliance Solutions
